

Kittens Group

Homework: Reading: Draw a line for the bee's path; answer questions about food chain, number the order of how we get milk, sort foods we get from plants or animals

Spelling- I picked random words from their vocabulary box. They are to write them in sentences, draw a picture of that word, and put the words in alphabetic order, as well as a word search.

Math- p. 391-392, 393, 394, 399- 400

Evan- chapter 25 worksheets

Literacy class- Students will continue reading *The Sun Gives Us Food*. We are working on sorting which animals eat plants, which eat meat, and which eat both plants and animals. We will also discuss that meat eaters eat the animals that eat plants so really all animals are dependent on the sun for their food. For writing, they finished up the spelling book they have been using, so they will be reviewing some words and doing different homework activities with them.

Math class- We are finishing up our measurement unit with temperatures this week. They will have a quiz at the end of the week. Evan will be taking his Unit 6 quiz on Wednesday and continue to learn about fractions this week.

Social Studies class- This week, they will be learning about different family traditions. They will learn how each family celebrates different holidays differently.
